(b) and (c) A target of 3000 Solar Home Systems was allotted to Karnataka during the year 2002-2003, against which an achievement of 3103 system has been reported. It is proposed to allocate a target of about 3500 solar home systems during the year 2003-2004 to Karnataka.

(d) The amount of subsidy released to Karnataka for solar home systems and street lighting systems during the year 2002-2003 was Rs. 94 Lakhs. So far, no subsidy on such systems has been released to Karnataka for the year 2003-04.

Potential of different kinds of Non-Conventional energy sources

857. SHRI LALITBHAI MEHTA: Will the Minister of NON-CONVENTIONAL ENERGY SOURCES be pleased to state:

(a) what is the potential of different kinds of non-conventional energy sources in the country, State-wise;

(b)the actual production of electricity through such non-conventional energy sources, State-wise;

(c) whether Government plants to tap non-conventional energy sources in the country; and

(d) what is the position of Gujarat in production.of non-conventional energy sources to its potential?

THE MINISTER OF STATE IN THE MINISTRY OF NON-CONVENTIONAL ENERGY SOURCES (SHRI M. KANNAPPAN): (a) State-wise estimated potential of major non-conventional energy sources such as wind, small hydro, bagasse cogeneration, energy from wastes and biogas is given in Statement-I. (See below)

(b) A total power generating capacity of about 3900 MW has been installed through various non-conventional energy sources in the country as on 31-3-2003. State-wise break-up of the same is given in statement-ll. (See below)

(c) A target capacity addition of 3075 MW from various non-conventional energy sources has been set for 10th Plan period, besides installation of various decentralized/standalone systems/devices for meeting cooking, heating, lighting and other energy needs.

(d) Against the estimated gross potential in Gujarat of wind (9675 MW), small hydro (157 MW), bagasse cogeneration (200 MW), energy from waste (112MW) and biogas plants (5.54 lakh), the cumulative achievements as on 31-3-2003 are 173.10 MW, 7.0 MW, 0.50 MW, 2.45 MW and 3.59 lakh plants respectively.

Statement-I

State-wise Estimated Potential for Non-conventional energy sources

Sl. No.	States'/UTs	Wind Power (MW)	SHP*** Cogeneration (MW)	Bagasse (MW)	Energy from Wastes (MSW) (MW)	Biogas* Plants (Nos. in lakh)
